## Logical:

```
#include <iostream>
using namespace std;
int main() {
   int num = 5;
   if (num % 2 = 0) {
      cout << "Even";
   } else {
      cout << "Odd";
   }
   return 0;
}</pre>
```

## Syntax:

```
#include <iostream>
using namespace std;
int main() {
    cout << number;
    return 0;
}</pre>
```
