Logical:

```java
public class SumOfArray {
    public static int sum(int[] arr) {
        int sum = 0;
        for (int i = 0; i <= arr.length; i++) {
            sum += arr[i];
        }
        return sum;
    }
    public static void main(String[] args) {
        int[] arr = {1, 2, 3, 4};
        System.out.println(sum(arr));
    }
}
```

Syntax:

```java
import java.io.*;
public class TestException {
    public static void main(String[] args) {
        FileReader fr = new FileReader("file.txt");
    }
}
```
